

FLEXIROL MULTIDIRECTIONAL

For light weight and heavy weight doors requiring 90° or 135° movement

Our Flexirol Multidirectional comes in two product variations – Flexirol Multidirectional 90 and Flexirol Multidirectional 135. The 90 degree system is designed for panels up to 100kg for both residential and commercial environments. The 135 degree system is designed for panels up to 500kg, for use in residential and commercial environments. The system can also be made entirely bespoke and tailored to your exact requirements.

Catering for wooden and aluminium doors, the system is ideal for shop fronts, internal room partitions, conference centres and showrooms. The stacking formation allows panels to be stored entirely clear of the opening.

For exterior applications please consult the P C Henderson technical team.
