

# TANGENT ROUND THE CORNER 290 HENDERSON

35kg Wood Metal Interior Exterior

Top hung system for round the corner applications

### Overview

Tangent Round the Corner is a robust top-hung door system for round the corner residential, commercial or light industrial wooden or metal doors. Catering for doors weighing up to 35kg, the system can accomodate panelled, flushed or glazed doors.

The system is ideal for applications whereby a bunched unit of parked panels would be impractical.

Only 3 to 5 panels should be hinged in 1 unit, but any number of untis may be used to suit panels from a minimum width of 711mm to a maximum of 900mm.

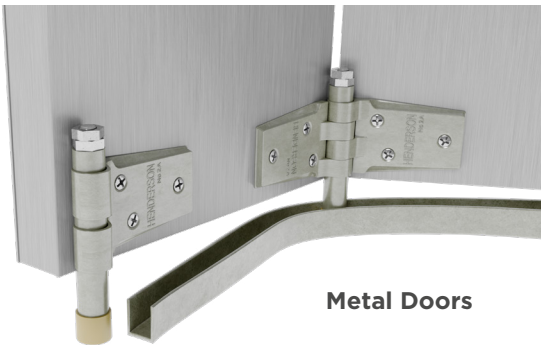

Wooden Doors

- ### Features and Benefits
- Caters for metal and wooden doors weighing up to 35kg each
  - Doors stack clear of the opening and park along the adjacent side wall
  - Ideal for applications where a bunched unit of parked leaves would be impractical
  - Doors can slide to one or both sides and can cover any width of opening by using any number of units on a single track
