

Sienna Glass

Stainless steel sliding system for glass panels weighing up to 120kg

Sienna Glass offers a stylish sliding system for glass panels weighing up to 120kg. The system features exposed stainless steel hangers which fix to the front of the glass panel and run effortlessly along a brushed stainless steel tubular track.

For flexibility of installation, the kit must be purchased in addition to the track and brackets. Choose between two bracket options to allow the system to be fixed to a solid or glass wall.

Two kits can be used for bi-parting doors.

Product Specification

Product Code	Door Width Range	Glass Thickness	Max. Door Weight
SN120G	500 - 3000mm	8, 10 or 12mm	120kg

Track and Bracket Specification - Must be purchased in addition to kit

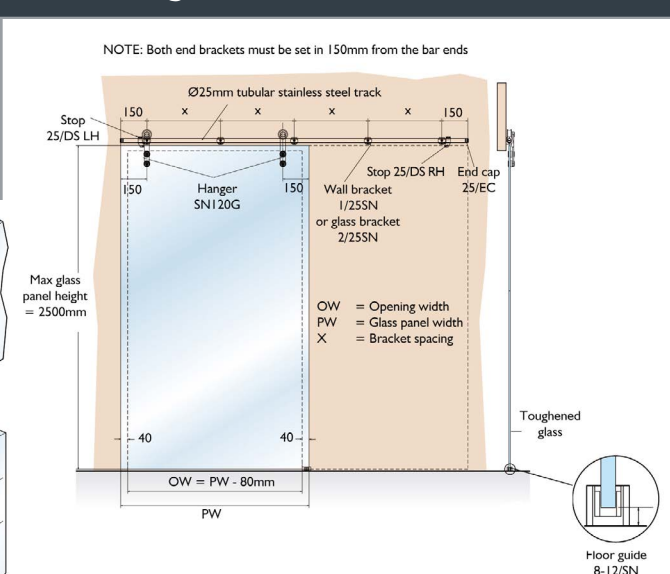

Component	Description	Product Code
Track	25mm stainless steel tubular track - 2000, 2500, 3000, 3500, 4000 and 6000mm	25/****
Brackets <small>View datasheet for details on bracket spacing</small>	Face fixed bracket for solid wall	1/25SN
	Face fixed bracket for glass wall	2/25SN

**** Replace by length of track for full product code

Kit Contents

Component	Quantity	Product Code
Hangers	2	-
Door Stops	2	25/DSR or 25/DSL
Guide	1	8-12/SN
Bar End Caps	2	25/EC

Product Diagrams

For bracket spacing calculations, please see the product datasheet which can be downloaded from our website.
