

# IMPERIAL KIT PACK

Bottom rolling sliding hardware system for external patio doors  
weighing up to 200kg.

Installation  
Video

## Features & Benefits

- Bottom rolling sliding door hardware system suitable for wooden doors weighing up to 100kg and 200kg.
- Ideally suited to external sliding patio door applications.
- Allows the weight of the door to be taken by the floor, making the system ideal for applications whereby there is insufficient overhead structural support.
- For bi-parting or bypassing door applications, two kits should be purchased.
- Available in kit pack format for locking and non locking versions to make specification and installation as easy as possible.
- Installation video available to guide you through the fitting process.

For complex applications, Imperial can be specified as individual components. Please see our Imperial Specified datasheet for more information.

## Kit Specification

Product Code		Track Length	Max. Door Width	Door Thickness Range	Max. Door Weight
Locking	Non Locking				
IMPATIO100/L	IMPATIO100/NL	3000mm	1500mm	40 - 56mm	100kg
