

RUSTIC 100

100kg Wood Metal Interior

HENDERSON

Unique sliding door hardware with beautifully crafted barn style hangers, for doors weighing up to 100kg

Overview

Rustic 100 is ideal for barn conversions, period properties or simply for a unique feature in the home. Suitable for internal doors weighing up to 100kg, the system creates a traditional look for sliding wooden or metal doors with the exposed steel straps fastening down the front of the door to support the rustic finish. The system is available in a choice of two finishes; matt black powder coat and stainless steel. Tracks are available in 2m or 3m lengths and a fittings kit can be purchased for when an extra door is required.

The system is also now available with an included single or double soft stop - a great addition to get the most out of your Rustic system. Simply push the door and the soft stop will gently decelerate the door and glide it into its final position, preventing unwanted slamming. The easy to install soft stop kit can be fitted to new or existing applications and can be combined with any finish of kit due to its discreet design.

Features and Benefits

- Available in 2m or 3m track lengths
- Black, stainless steel or our new antique rust finish
- Fittings kit available for double door specifications
- Available as standard, single soft stop or double soft stop
- Installation video available at www.pchenderson.com
