Sliding & Folding Door Hardware

2024/5
Volume 1

Our Story

Established in 1921, P C Henderson has over 100 years experience in the design and manufacture of high quality sliding and folding door hardware.

From humble beginnings, P C Henderson began trading from an office based in Essex with 3 employees offering hay carriers and sliding door gear to the agricultural sector. Fast forward 100 years, P C Henderson is now a leading name in the sliding and folding door hardware industry with 4 offices worldwide - UK, Ireland, the Netherlands and China.

Our reputation is built on our vast product range which caters for anything from small sliding cupboards to 8000kg industrial sliding doors. We believe in exceptional product design, rigorous testing and use of high quality materials to produce products which are both functional and aesthetic in design. As such, our products can be seen in a wide variety of applications across the world.

Why P C Henderson?

As a designer and manufacturer of sliding and folding door hardware since 1921, it's safe to say that our expertise in this area is of the highest standard. Proudly made in the UK, our product range consists of over 40 products suitable for internal and external applications, a range of door materials and options for top hung and bottom rolling support options.

Our customer service and technical support team have exceptional product knowledge to support with product specification for projects of all sizes - even the most complex and ambitious of projects.

Our website contains a wealth of information including datasheets, imagery, installation videos, technical drawings, and fitting instructions as well as a product finder tool to aid our customers in product specification.

At P C Henderson, our ethos includes the continuous improvement of products and rigorous testing to maintain our market leading position. Working from a foundation of robust market research, all of our products are designed with our customers in mind to develop systems which are both functional and aesthetic, as well as offering easy installation and maintenance.

Certified to ISO 9001, P C Henderson strive to offer the highest quality products using efficient processes, a highly trained team and the finest materials. Our on-site testing facilities shows our commitment to product longevity. Each product is subject to physical testing before launch to achieve in excess of 100,000 cycles (accredited to BS EN 1527). As a result, the majority of our products are covered by a 10 year manufacturer

Product Matrix

Our brochure is ordered by operation type and door weight - beginning with **sliding hardware** suitable for cupboards and ending with systems capable of moving 8000kg industrial doors. It moves onto **folding hardware solutions** for internal cupboards, wardrobes and partitions weighing up to 125kg and external bifold doors weighing up to 100kg. This is followed by our **specialist systems** which are suitable for unique applications such as automated sliding systems, sliding shutters, multi-directional partitions and round-the-corner applications. Finally, browse our range of **complimentary accessories** to further enhance your hardware system.

Our aim is to make product specification as easy as possible. Each product page contains a wealth of **product information and technical drawings** to help you find the right hardware solution. Some of our systems are available in a handy **kit pack format** which contains all components required for installation. The majority of our kit packs have a step by step **installation video** - look out for the QR code on the product page. Alternatively, many of our products come with an option to specify components individually, allowing for enhanced versatility to create a solution specific to your installation.

Case Studies

Self-Build Property, Ireland
This impressive self-build bungalow, situated in the beautiful countryside of Aughrim, Co. Wicklow Ireland, had light and space at its heart, right from its inception.

The Brief
The client required a home which provided spacious open plan living that maximised the floor space and provided flexibility for the whole family. Creating both a bright and minimalistic space was key to the build whilst maintaining the option for smaller rooms when needed.

The Solution
Using the P C Henderson Sienna sliding door hardware system with glazed doors, the client was able to create a clear walkway between the living space and the bedrooms. This solution had the added functionality of closing off this walkway when required for cosy living with styling that suited the contemporary décor.

De Maria Restaurant, Madrid
De Maria Restaurant is a high end luxury restaurant located in the heart of Madrid.

The Brief
The project brief demanded a cost effective, flexible and adaptable solution to effectively divide the restaurant floor area – creating two zones within the large space.

The Solution
Utilising our Flexirol Mutlidirectional hardware, a moving wall was installed into the middle of the saloon using timber doors to match the restaurant’s interior design. The doors also discreetly stacked to the side of the opening when not in use.

Intercontinental Hotel, Bali
The Taman Gita Restaurant, based in the Intercontinental Hotel in Bali, underwent an extensive refurbishment programme which transformed it into an elegant, contemporary environment.

The Brief
As part of the new design for the restaurant required flexibility between the open kitchen and the dining area. This area had a ceiling height of 5.4m and needed a solution that was easy to operate and robust to withstand high traffic use.

The Solution
Through incorporating our Soltaire sliding door hardware, full ceiling height doors were comfortably supported by the system and operate with minimal effort and low friction.

River Yealm, UK
London based architectural practice, Wimshurst Pelleriti, was appointed to deliver a bespoke boathouse project on the River Yealm in Devon, UK.

The Brief
The architects needed to design a system that balanced both a challenging location (a steep sided river estuary) with the need for large scale storage.

The Solution
Using the P C Henderson Straight Sliding door hardware solution, the innovative infrastructure contained seven sliding door systems which maximised storage space and ensured easy access to the quayside. The straight sliding system has the advantage of being made from corrosive resistant materials, a necessity in a marine environment.

Sliding

Catering for doors weighing up to an impressive 8000kg, our wide range of sliding door hardware systems offer a solution for virtually any type of application or design.

Our industry leading sliding hardware systems have been expertly designed to offer huge versatility in a wide range of applications. For residential and commercial projects, sliding doors are a great way to save space, open up rooms, increase natural light and provide easy access. For industrial applications such as factories, warehouses and agricultural settings – robust hardware and high levels of security are key.

Browse our range of hardware systems for a variety of applications and configurations such as single sliding, bi-parting, soft closing, pocket door, telescopic, fire rated, top hung and bottom rolling. For those all important aesthetic finishes, you have a choice between concealed hardware systems for a sleek and modern design or exposed components for a more traditional and period look.

Range Overview

- Over 28 different systems
- Catering for doors weighing up to 8000kg
- Catering for wood, metal and glass doors
- Available for interior and exterior applications
- Top hung and bottom rolling options
- Fire rated and non fire rated options

Loretto

For bypassing sliding cupboard doors weighing up to 23kg

Loretto is the perfect partner for bypassing sliding cupboard doors weighing up to 23kg. Designed as a bottom rolling system using nylon guides and rollers on an aluminium track, Loretto offers a smooth and quiet system.

Choose between three kit packs to cater for an opening width of up to 1800mm.

SlideLite 50

NEW!

Sliding wardrobe system for bypassing doors weighing up to 50kg with dual soft close

New to the range, SlideLite 50 offers an exceptionally smooth running system for bypassing sliding doors in wardrobe applications. Designed with dual soft-close as standard, SlideLite 50 prevents slamming doors by gently decelerating the door into the open and closed position.

The system boasts quick and easy installation for DIY projects and professional installers alike. For flexibility of installation, rollers can be surface mounted to the door or routed for a professional installation.

Choose between our kit packs for 2 or 3 bypassing doors. A fittings kit is available as an optional accessory for applications where additional doors are required.

Mansion 55

Bottom rolling hardware system for internal wooden doors up to 55kg

Mansion 55 offers a durable system which is perfectly suited to single sliding, bi-parting or bypassing wooden doors weighing up to 55kg.

The product features a concealed bottom rolling system which enables the weight of the door to be transferred to the floor. As a result, this system is perfect for applications where the ceiling or lintel isn't strong enough to support the weight of the door.

Mansion 55 is specified by individual components to increase the systems versatility.

Sirocco

Self-closing system for sliding wooden doors weighing up to 80kg

Sirocco offers a self-closing sliding door system perfectly suited to healthcare applications including hospitals, care homes and disabled access points. Featuring an integrated mechanical self-closing mechanism and an adjustable closing speed setting, Sirocco brings the door to a soft and gentle close.

Catering for wooden doors weighing up to 80kg, Sirocco is available in two kits to cater for right hand and left hand opening.

Optional accessories include a delayed closing timer allowing for adjustment of the time before the self close engages, holding the door open and allowing easy access.

Product Specification					
Product Code	Description	Track Length	Max. Door Width	Door Thickness Range	Max. Door Weight
SIRLH	Left hand	2200mm	1200mm	30 - 46mm	80kg

Component	Description	Product Code
Delayed Closing Timer	Left hand	DELLH
Delayed Closed Timer	Right hand	DELRH

Pocket Door

Sliding pocket door solution that works with cavity walls for doors weighing up to 60kg

Pocket Door is a unique sliding door solution whereby the sliding door disappears into a cavity wall upon opening, offering amazing benefits for environments where space is limited such as bathrooms, en suites, kitchens, utility rooms, walk in wardrobes and disability access areas.

Catering for wooden doors weighing up to 60kg, Pocket Door is available as a standard kit or with dual soft close to bring the door to a gentle open and close, preventing slamming. For bi-parting doors, two kits can be used. Each kit comes with a pre-assembled track and header mechanism, hangers, uprights, clip stop, track stop, guide and round satin flush pull set.

For a more professional and robust pocket door solution, please view our Pocket Door Pro on page 36.

Marathon Fire Rated

Sliding door solution for certified FD30 sliding fire doors weighing up to 90kg

Marathon Fire Rated is suitable for a 30 minute sliding fire door assembly certified to BS476: Part 22: 1987 and should be installed on the non-fire risk side of the aperture. Suitable for use with a certified FD30 fire door, choose between FDK1 self-closing or FDK2 non self-closing system. Please consult your Building Inspector prior to purchase to determine if you require hardware for a self close application.

A Marathon 90 kit should be purchased in conjunction with a Marathon Fire Rated kit.

Rustic 100

Sliding door system with beautifully crafted barn style hangers for doors weighing up to 100kg

Rustic 100 is ideal for barn conversions, period properties or simply to bring a unique feature to the home. Suitable for internal wooden doors weighing up to 100kg, the system creates a traditional look with a flat bar track and exposed barn style hangers which fasten to the front of the door. Choose between two stunning finishes - matt black or stainless steel. Each kit comes complete with 2 oval flush pulls.

The system is available as standard or with an included soft stop for single or dual action. The Rustic Soft Stop boasts a discrete design and smooth operation to gently decelerate the door into the open and/or closed position - preventing unwanted slamming. For pre-existing Rustic 100 installations, the Rustic Soft Stop can be easily retrofitted. Please note, when installed with a Rustic Soft Stop, the maximum weight capacity is reduced to 80kg per door.

For bi-parting applications, two kits can be purchased or a 1 door fittings kit can be specified.

Rustic Soft Stop* - 80kg Max. Door Weight	R80SOFT
1 Door Fittings Kit - Matt Black	R100
1 Door Fittings Kit - Stainless Steel	R100SS

* For soft close AND open, you must purchase 2 x R80SOFT

NOTE: BI-PARTING DOOR APPLICATIONS WITH SOFT CLOSE

Due to fixing locations within the track, bi-parting door applications on one length of 2m or 3m track can only achieve **soft open**.

For double soft stop action (**soft close AND open**), please purchase 2 Double Soft Stop Kits in 2m or 3m lengths.

Rustic Top Mount

Sliding door system with top-mounted barn style hangers for doors weighing up to 100kg.

Rustic Top Mount offers a modern twist on our classic Rustic 100 - with its hangers mounted to the top of the door. Ideal for barn conversions, period properties or as a unique feature in the home, Rustic Top Mount caters for wooden doors weighing up to 100kg and is available in two finishes - matt black or stainless steel. For a quiet and smooth operation, Rustic Top Mount has been designed with nylon rollers and a flat bar track.

The system is available as standard or with an included soft stop for single or dual action. The Rustic Soft Stop boasts a discrete design and smooth operation to gently decelerate the door into the open and/or closed position - preventing unwanted slamming. For pre-existing Rustic Top Mount installations, the Rustic Soft Stop can be easily retrofitted. Please note, when installed with a Rustic Soft Stop, the maximum weight capacity is reduced to 80kg per door.

For bi-parting applications, two kits can be purchased or a 1 door fittings kit can be specified.

Husky Sliding 100

Versatile sliding system for wooden or metal doors weighing up to 100kg

Husky Sliding 100 offers an extremely versatile hardware system which is suited to many applications including sliding wardrobes, passage doors and room dividers. The system has been designed with easy-to-install components for rapid installation. Cater for wooden or metal doors weighing up to 100kg, Husky Sliding 100 can be both face fixed or soffit fixed for flexibility of installation.

The system is available in various kit packs to cater for door widths up to 1250mm. Each kit is available with a choice of steel or aluminium track. An anodised aluminium track is also available upon request. For bi-parting door applications, a fittings kit should be purchased. For bespoke projects, Husky Sliding 100 can be specified by individual components, contact P C Henderson for more information.

For a more professional sliding system, view our Husky 120 Pro system on page 30.

Husky 120 Pro

High performing, professional sliding door system for wooden or metal doors weighing up to 120kg

Husky 120 Pro is a high performing, professional level sliding system ideally suited to sliding wardrobes, passage doors and room dividers. Catering for wooden and metal doors weighing up to 120kg, the system has been designed to offer an exceptionally smooth operation which also boasts easy installation and low initial friction.

Husky 120 Pro is available in kit pack format and can be face fixed or soffit fixed to suit your application. For bi-parting door applications, a fittings kit can be purchased. Alternatively, Husky 120 Pro can also be specified as individual components.

To further enhance our Husky 120 Pro system, view our accessories on pages 32 to 33.

Husky 120 Pro Accessories

Husky 120 Pro Soft Close

Suitable for wooden and metal sliding doors weighing up to 120kg, our new Dual Soft Close prevents unwanted slamming by gently decelerating the door and pulling it into its stationary position, increasing the overall longevity of the product.

The soft close is extremely easy to install. Once installed, the soft close is concealed within the track for a discreet finish.

Please note: Husky 120 Pro kit must be purchased in addition to the Soft Close.

Product Code	Door Width Range	Door Weight Range
SOFTHP/60	600 - 950mm	10 - 60kg
SOFTHP/120	600 - 950mm	60 - 120kg
SOFTHP/WD	950 - 2500mm	20 - 120kg

Husky 120 Pro Simultaneous Action

Catering for wooden doors weighing up to 120kg, our Simultaneous Action kit allows for the synchronised opening of bi-parting doors. Open or close one door and the other will move simultaneously.

Please note: Husky 120 Pro kit must be purchased in addition to the Simultaneous Action kit.

Product Code	Door Thickness Range	Max. Door Width	Door Weight Range
SIMHP120	25 - 50mm	1250mm	25 - 120kg

Compact 120

The Compact 120 Low Headroom kit has been designed with discreet and concealed components which are routed into the top of the door - reducing the clearance between the track and top of the door to 2mm.

Catering for wooden doors weighing up to 120kg, Compact 120 is suitable for applications with restricted headroom or seeking a minimalistic finish or floor to ceiling sliding doors.

Please note: Husky 120 Pro Kit must be purchased in addition to the Compact 120.

Product Code	Min. Door Thickness	Max. Door Weight
CP120	35mm	120kg

Husky 120 Pro Accessories

Husky 120 Pro Glass Patch Kit

The Husky 120 Pro Glass Patch kit allows Husky 120 Pro to be used with 10mm or 12mm glass panels weighing up to 100kg. The kit has been designed with patches which fix to the glass and requires the glass panel to be machined prior to installation.

Designed with aesthetics and functionality at the forefront, Husky 120 Pro Glass Patches are easy to install.

Please note: Husky 120 Pro kit and must be purchased in addition to the kit.

Component	Product Code	Glass Thickness	Door Weight Range
Husky 120 Glass Patch kit	GP100	10mm or 12mm	25 - 100kg

Husky 120 Pro Glass Clamp Kit

Husky 120 Pro Glass Clamps offers a sliding solution for lightweight glass panels weighing up to 75kg. The system has been designed with glass clamps which mount the glass and therefore does not require any machining.

The clamps are available in various options to cater for glass panels which are 8mm, 10mm or 12mm thick.

Please note: Husky 120 Pro kit and must be purchased in addition to the kit.

Component	Product Code	Max Panel Width	Glass Thickness	Max. Panel Weight
Husky Glass Clamp Kit	8/HY/75	1250mm	8mm	75kg
	10/HY/75		10mm	
	12/HY/75		12mm	

Telescopic

For sliding telescopic doors weighing up to 120kg

Telescopic is a unique sliding door solution designed with a toothed belt and pulley system to link the doors together. By moving the lead door, all other doors travel simultaneously.

The Telescopic range is perfect for wide openings to create room dividers or partition doors. When open, the doors neatly stack to one or both sides of the opening to offer a walkway free of obstruction.

Telescopic is available in kit pack format to create various door configurations. Opt for Husky Telescopic for residential applications and Soltaire Telescopic for commercial projects. Please note: the track must be purchased in addition to the kit.

Pocket Door Pro

Professional sliding door solution for cavity walls with doors weighing up to 120kg

Pocket Door Pro offers a professional hardware system that allows doors to effortlessly slide into a cavity wall - perfect for saving space in homes, apartments, educational buildings, hospitals, hotels and office blocks.

The system has been designed to allow for easy installation with a high-quality aluminium cavity frame which comes with push together parts. The track has also been designed with an extension piece, allowing access to components within the track after installation for easy door removal.

Catering for doors weighing up to 120kg, Pocket Door Pro comes in 7 kit options to suit standard doors sizes. Kits can be cut to length to cater for non standard sizes. For bi-parting doors, two kits can be purchased.

The kit can be further enhanced with a timber liner kit for an aesthetic and professional finish, a dual soft close to prevent unwanted slamming and a simultaneous action kit for the movement of bi-parting doors.

This system is also available for FD30 rated fire doors, please view page 38.

Pocket Door Pro Fire Rated

Fire rated pocket door hardware solution certified to FD30 standards

Pocket Door Pro Fire Rated offers a sliding solution for both single and bi-parting doors which has been certified to FD30 standards. The system has been tested as part of a 30 minute fire door assembly to BS 476:Part 22:1987 and BS EN 1634-1:2014 + A1:2018.

Catering for doors weighing up to 120kg, Pocket Door Pro Fire Rated **must be specified in two parts to combine the certified Fire Rated Liner kit and the Pocket Door Pro hardware kit.** The liner kit contains intumescent seals and is made out of high quality finger jointed redwood. The Pocket Door Pro system is available in a kit pack format which can be cut to size to suit your door height and width. A solid core FD30 timber based fire door should be fitted with this system.

The system has been designed to ensure easy installation and system maintenance as a priority with a high quality aluminium frame which comes with push together parts and a track extension piece which allows access to the components within the track after installation.

For bi-parting systems, two Pocket Door Pro hardware kits and a bi-parting liner kit should be purchased.

Product Kit Specification - Pocket Door Pro Fire Rated Kit					
Product Code	Door Width Range	Door Height Range	Door Thickness	Max. Door Weight	Finished Wall Thickness

LKFD30/120	BIFD30/120	45mm	140mm or 145mm
LKFD30/125	BIFD30/125	45mm	140mm or 145mm

Product Diagrams

Finished Wall Thickness Calculation

To ensure compliance to BS 476 Part 22 and BS EN 1634, 12.5mm of extra fire rated board should be applied to either side of the cavity when using a fire rated liner kit. This brings the finished wall thickness to 145mm or 150mm.

145mm Finished Wall Thickness

95mm cavity + 12.5mm plasterboard either side = 120mm + 12.5mm additional fire rated board either side = 145mm finished wall thickness

150mm Finished Wall Thickness

100mm cavity + 12.5mm plasterboard either side = 125mm + 12.5mm additional fire rated board either side = 150mm finished wall thickness

Sienna

Stainless steel sliding system for wooden doors weighing up to 120kg

Sienna is a high quality, elegant sliding system which caters for doors weighing up to 120kg. The system has been designed with brushed stainless steel components including a tubular track and top mounted hangers which fix to the top of the door.

Sienna must be specified in two parts - the kit and track must be purchased separately to allow for flexibility of opening width. Two kits should be purchased for bi-parting door applications.

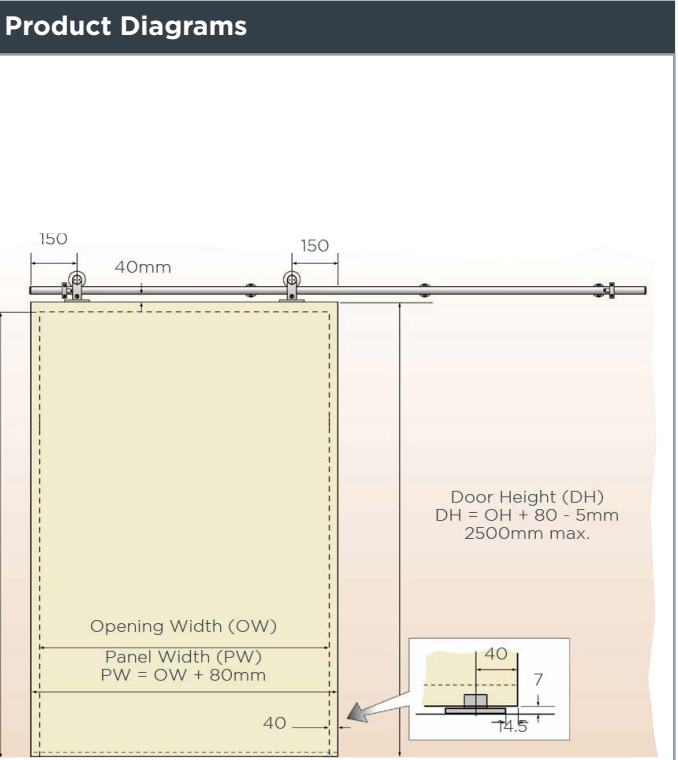

Product Specification

Sienna Glass

Stainless steel sliding system for glass panels weighing up to 120kg

Sienna Glass offers a stylish sliding system for glass panels weighing up to 120kg. The system features exposed stainless steel hangers which fix to the front of the glass panel and run effortlessly along a brushed stainless steel tubular track.

For flexibility of installation, the kit must be purchased in addition to the track and brackets. Choose between two bracket options to allow the system to be fixed to a solid or glass wall.

Two kits can be used for bi-parting doors.

Pacer Sliding

For wooden and metal sliding doors weighing up to 200kg

Max.
200kg

INTERNAL &
EXTERNAL

Pacer Sliding is a durable sliding door system suitable for wooden, aluminium or metal doors weighing up to 200kg. The system is ideal for commercial applications including hotels, offices and shop fronts.

The system can be face fixed or soffit fixed and is specified by individual components for flexibility of installation. Choose between a range of hanger options depending on your door material, as well as various guide options to support applications with and without a guide channel.

Imperial

Bottom rolling sliding system for external patio doors weighing up to 200kg

Imperial is a bottom rolling system suitable for sliding patio doors weighing up to 200kg. As a bottom rolling system, Imperial allows for the weight of the door to be taken by the floor and is therefore ideal in applications where there is insufficient structural support.

Imperial is available in kit pack format with locking and non locking versions for ease of specification and installation. The locking version comes complete with a high security 6 hook lock and keep plate. Alternatively, Imperial can also be specified as individual components to create a unique system to suit your application. To cover any width of opening, multiple doors can be used on single or multiple lengths of track.

Soltaire

Top hung sliding system for external doors weighing up to 250kg

Scan for the
Installation
Video

Soltaire is a beautifully crafted top hung sliding system which caters for single panel, bypassing or bi-parting doors weighing up to 250kg.

Manufactured from marine grade 316 stainless steel, the system is ideal for both internal and external applications as well as coastal environments due to its corrosion resistant properties.

Soltaire is available in ready made kit packs for both internal and external applications. Each kit pack include a track, hangers, guides, track stops and flush pulls for ease of specification and installation. For bi-parting doors, two kits should be purchased.

Alternatively, Soltaire can be specified as individual components to increase the versatility of the system. Choose between a wide range of hangers, guide and channel options to suit your application. For further flexibility, the track can be soffit or face fixed.

Soltaire can be further enhanced with a number of accessories including a simultaneous action kit for bi-parting doors and a low headroom kit for applications with restricted headroom.

Stainless Steel

High performing sliding door system suitable for doors weighing up to 270kg and exposed to high levels of corrosion

Stainless Steel offers a high performing sliding door system for wooden and metal doors weighing up to 270kg with exceptional corrosion resistant properties.

Manufactured from high quality stainless steel, the system is perfectly suited to applications such as chemical factories, oil rigs, abattoirs, cold storage, food processing plants and areas exposed to high salt contents. The systems track, brackets and guide channel are manufactured from marine grade 316 stainless steel and the hanger components are made from nylon or 304 grade stainless steel.

To allow for maximum flexibility, Stainless Steel can be specified as individual components for varying door weights. Choose between a range of hangers, brackets, guide and track stop options to suit your application. The track can be face fixed or soffit fixed.

Sterling

Heavy duty sliding system for bottom rolling wooden and metal doors weighing up to 8000kg

Sterling offers a robust system for heavy weight doors in industrial applications such as warehouses, agricultural buildings and aircraft hangers. Designed as a bottom rolling system, Sterling is suited to applications with insufficient structural support. Five systems are available to cater for wooden doors weighing up to 2000kg and metal doors weighing up to 8000kg. The system can be installed on single or multiple lines of track and can be face fixed or soffit fixed.

Folding

Our range of folding door hardware has been expertly designed to cater for doors weighing up to 125kg, interior and exterior applications, endfold and centrefold operation as well as offer a number of configurations to suit most applications.

Whether it be for a bi-folding cupboard, a versatile room divider or a stylish exterior system to open up a home to the outside world – P C Henderson has a folding door solution for every project.

When used internally as room dividers and partitions, folding doors are the perfect way to create flexible living and working environments, allowing an entire room to be opened up at ease. When used externally, folding doors can help to bring the outside in, making the most of natural light and external views.

Range Overview

- Over 12 different systems
- Catering for doors weighing up to 125kg
- Suitable for wooden or metal doors
- Top hung or bottom rolling options
- Internal and external applications

Bifold

For folding wardrobe and cupboard doors weighing up to 14kg

Designed for wooden doors weighing up to 14kg, Bifold offers a folding system for cupboard and wardrobe doors that can complement any room. The system is available in various kit pack options to support a range of door configurations. An optional fittings kit is available for when additional doors are required. This system caters for a maximum of 4 doors to folding to each side.

Huskyfold 30

NEW!

For internal folding room dividers and wardrobes weighing up to 30kg

New to the range, Huskyfold 30 replaces our original Husky Folding system to offer an internal folding door solution ideal for room partitions in the home to enhance flexible living. When open, the doors can neatly stack to one or both sides of the opening to connect two rooms. When closed, the doors divide two rooms into individual spaces.

Catering for doors weighing up to 30kg, Huskyfold 30 utilises components from our popular Husky 120 Pro range to offer a high quality system with effortless operation and low initial friction.

Huskyfold 30 has been designed with the installer in mind to offer easy installation - with a fast fix hanger assembly and spring loaded pivot to allow the doors to be hung quickly and easily. Other new design features include high quality flush hinges which reduces the clearance between the doors to 2mm, as well as removal of a bottom guide channel for a clear walkway between rooms and a hinge handle for easy closure of the doors.

The system is available in a number of door configurations as well as the option to specify a fittings kit for when additional doors are required. To secure the doors in place when close, we recommend purchasing flush bolts with this system.

Roomflex 40

Professional internal folding door solution ideal for room dividing doors weighing up to 40kg

Roomflex 40 is an internal folding door solution ideal for creating flexible living environments. When open, the doors stack to one or both sides of the opening to create spaces which are great for entertaining. When closed, the smaller rooms can be used for independent activities.

Designed for wooden doors weighing up to 40kg each, Roomflex 40 offers a professional system for joiners and installers. Utilising Husky 120 Pro components, the system has been designed with robust hardware for increased longevity. The system has also been designed without a bottom channel, allowing for a seamless walkway between rooms. Please note: the track must be specified in addition to the kit.

Roomflex 50

Folding door solution for internal, light commercial applications for doors weighing up to 50kg

KIT PACK

Max.
50kg

INTERNAL

Roomflex 50 is a high-quality internal folding door system perfectly suited to light commercial applications. Utilising components from our popular Soltair system, Roomflex 50 offers an extremely durable and smooth running system. The system has also been designed to completely eliminate the need for a bottom channel, allowing for an seamless walkway from room to room.

The system caters for various door configurations which can be created by combining the below kits. The track should be specified in addition to the kit to allow for flexibility of the opening width.

Tangent Folding

For folding wooden or metal doors weighing up to 70kg

Tangent Folding is a range of robust, top hung hardware systems for folding wooden or metal doors weighing up to 70kg. The system covers any width of opening, allowing any number of doors to be used. Doors can fold to one of both sides of the opening or can be stacked behind a reveal if required. When installed with an even number of panels, doors can be hinged to post or free floating. When an odd number of panels is required, an access door can be incorporated.

Pacer Folding

Internal folding solution for centrefolding or endfolding doors weighing up to 75kg

Pacer Enfold

Pacer Endfold is a top hung system catering for end folding doors whereby the hanger fixes to the edge of the door. The system has been designed with an option of two-wheeled or four-wheeled hanger to cover applications weighing up to 65kg. Doors can fold to the right or left of the opening, as well as being hung as floating units.

Pacer Centrefold

Designed for interior folding doors, Pacer Centrefold is a centre folding system whereby the doors are hung centrally below the track, allowing the doors to hang evenly in both rooms when in the stacked position. For applications hinged to the jamb, 1.5, 3.5, 5.5 or 7.5 doors can be used. Doors can fold to one or both sides of the opening.

Pacer Centrefold

Soltaire Endfold

For metal or wooden end-folding doors weighing up to 75kg

Soltaire Endfold offers a folding door system for doors weighing up to 75kg. Ideal for commercial applications, Soltaire Endfold utilises components from our popular Securefold Pro and Soltaire systems to create an extremely durable and hard-wearing product. Manufactured from marine grade 316 stainless steel, the system is suitable for external and coastal applications.

Available in kit pack format, Soltaire Endfold offers multiple combinations to cover a variety of opening widths, with doors folding to one or both sides of an opening. The system allows adjustment on all doors, and is particularly suitable for partitions where all doors are of equal width.

Product Specification

Product	Product Code	Door Configuration	Max. Door Height	Max. Door Width	Door Thickness Range	Max. Door Weight
Soltaire Endfold 45kg	SEF145	2 Door Base Kit	3300mm	900mm	35 - 44mm	45kg

Soltaire Centrefold

For metal or wooden centre folding doors weighing up to 75kg

Soltaire Centrefold is the ideal solution for folding partition doors weighing up to 45kg and 75kg in residential and commercial applications.

As a centre folding system, the doors are hung centrally below the track, allowing the doors to hang evenly in both rooms when in the stacked position. A half door is also required which is hinged to the jamb. As well as offering multiple panel combinations for a variety of opening widths, panels can be floating or fold to one or both sides of the opening.

Manufactured from 316 marine grade stainless steel, Soltaire Centrefold is an extremely durable and hard-wearing system.

Securefold Bottom Rolling

Bottom rolling system for folding wooden doors weighing up to 80kg

Utilising bottom rolling technology, Securefold Bottom Rolling offers an external folding system whereby the weight of the door is carried by the floor - allowing the doors to be installed into virtually any space without the need for major structural building support. The system is typically installed in applications such as orangeries, conservatories, out buildings and extensions.

The system has been designed to allow for outward opening with options for standard mortice and non mortice hinges. Available in four stunning finishes - gold, black, chrome or satin - Securefold Bottom Rolling caters for virtually any decor scheme.

As an optional accessory, choose between our range of locking and non locking flush bolts in a range of lengths. Alternatively, our Twinbolt locking system featuring top and bottom throw rods which are operated by the turn of a handle to engage two points of locking.

Hinge Options	
	Mortice Standard The Securefold standard hinge option combines mortice end door pivots to create a clean finish. The pivot is concealed between the door and the jamb and uses the trusted surface mounted intermediate hinges for ease of installation across the remaining door configurations. The standard hinge is suitable for wooden doors.
	Non Mortice A non mortice hinge is an entirely surface mounted system that requires no routing or additional preparation before the fitting process. This is an easy and versatile option of hardware which can be used on wooden or aluminium doors.

Securefold Pro

The ultimate external bifold door hardware system for doors up to 100kg.

Securefold offers the very best in external folding door hardware systems to help you securely open up an interior space to the outside world. The system caters for top hung, exterior wooden or aluminium doors weighing up to 100kg and requiring outward or inward opening.

Securefold Pro has been designed with the installer in mind to allow for easy installation and adjustment. Design features include universal end hangers for both left hand and right hand orientations, a pivot for easy lateral adjustment by a simple turn of an allen key and R-Loc - a clever ratchet system allowing the installer to easily raise and lower the doors.

Securefold Ultra features enhanced hinges to allow for enhanced security and has been tested to both **PAS 24** and **BS EN 1627 RC2 standards**.

All components are made from marine grade 316 stainless steel to provide exceptional corrosion resistance in external and coastal environments. Our hinges have also been passivated to reduce discolouration when exposed to the elements. Choose between our four stunning finishes to complement virtually any colour scheme - satin, chrome, gold and black.

Optional accessories include flush bolts available in locking and non locking versions for both inward and outward opening. Designed for enhanced grip and with a low profile key to allow the door to close with the key engaged within the lock. A bespoke jamb kit is also available which allows for a professional finish against the jamb.

Hinge Options

Mortice Standard

The Securefold standard hinge option combines mortice end door pivots to create a clean finish. The pivot is concealed between the door and the jamb and uses the trusted surface mounted intermediate hinges for ease of installation across the remaining door configurations.

Non Mortice

A non mortice hinge is an entirely surface mounted system that requires no routing or additional preparation before the fitting process. This is an easy and versatile option of hardware which can be used on wooden or aluminium doors.

Mortice Round

Mortice round hinges, also known as mortice radius, are perfectly suited to joiners and installers with access to CNC machinery. The hinges are routed into the frame of the door, providing a flush and professional finish.

Flexirol Folding

For heavyweight endfolding or centrefolding doors weighing up to 125kg

Flexirol Endfold

Flexirol Endfold is the perfect partner for commercial applications requiring heavy-weight, folding doors. Designed as an end-folding system, the hangers are fixed to the edge of the door. Doors can be hung to the left or right of an opening as well as hung as a floating unit.

Flexirol Centrefold

Flexirol Centrefold offers a centrefolding system for heavyweight doors in commercial applications whereby the doors can fold to one or both sides of the opening. For applications hinged to the jamb, 1.5, 3.5, 5.5 and 7.5 doors can be used.

Specialist Systems

For unique and specialist applications, we offer a range of hardware solutions including round-the-corner garage doors, sliding automated doors, sliding shutter solutions and multidirectional partitions.

Typically used for garage doors, **Round-the-Corner** offers a robust solution for applications where a unit of stacked doors would be impractical or unsuitable.

Evolve, our range of **automated sliding door systems**, offers an exceptionally convenient and highly sophisticated solution for residential and light commercial applications. Doors can be operated by button, remote control or activation of a movement sensor. Choose between our standard sliding or pocket door systems.

Shutter Slide offers a high performing **sliding hardware system** for the movement of external **shutters** to help harvest energy, optimise room temperatures, increase air ventilation and provide flexible privacy options in residential and commercial applications. This versatile system offers a wide range of possibilities including various door configurations and manual or automated operation.

Finally, our range of **multidirectional door hardware systems** offers a tailored solution for doors requiring 90 or 135 degree movements. This system is ideal for commercial applications including shop fronts, room partitions, conference centres, showrooms and moveable walls.

Range Overview

- 4 specialist hardware systems
- Catering for various maximum door weights between 35kg and 500kg.
- Suitable for wooden, metal or glass doors
- Internal and external applications

Tangent Round the Corner

Round the corner system perfect for garage door applications for doors weighing up to 70kg

Suitable for garage door applications, Tangent Round the Corner is a robust top hung system which allows a number of doors to slide around a corner and is ideal in applications whereby a stack of parked doors would be impractical.

The system caters for wooden and metal doors weighing up to 70kg. Only 3 to 5 panels should be hinged in 1 unit, but any number of units may be used to suit panels between 711mm and 900mm wide.

Product Information

Product	Door Width Range	Door Thickness Range	Max. Door Weight

Evolve

Automated sliding system for wooden, metal or glass doors weighing up to 80kg

Evolve offers a smooth and reliable automated sliding system - an ideal solution for mobility access or a light commercial application.

Evolve is available in kit pack format for wood, metal or glass doors used in single or bi-parting applications. The kit includes wall mounted control panels to allow the doors to be opened by the push of a button, alternatively a remote control or motion sensor can be purchased as an optional extra.

Wooden or Metal Door Application

Glass Door Application

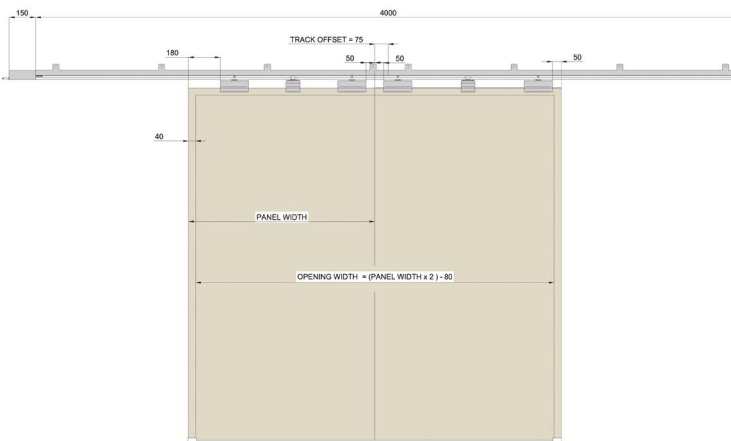

For metal doors, suitable fixings must be used.

Single Door Application

Bi-Parting Door Application

Evolve Pocket Door Pro

Automated sliding system for pocket doors weighing up to 80kg

Evolve Pocket Door Pro is a professional hardware solution that allows doors to automatically slide into a cavity wall. Catering for wooden doors weighing up to 80kg in residential or light commercial applications, the system is ideal for rooms where space is limited such as bathrooms, en-suites or kitchens as well as improving mobility access.

The system comes with wall mounted control panels as standard. Alternatively, the doors can also be opened by remote control or activation of a movement sensor - see our optional accessories for more details.

Evolve Pocket Door Pro has been designed with the installer in mind to make installation and maintenance of the system as easy as possible. The high-quality aluminium cavity frame comes with push together parts for rapid installation.

The system is available in kit pack format, which can be cut to size, and caters for a finished wall thickness of 120mm or 125mm. For bi-parting doors, two kits should be purchased. For a professional finish, a liner kit is available for both single or bi-parting door applications as an optional extra.

Shutter Slide

Straight sliding hardware for the movement of manual and automatic louvre panels

Shutter Slide offers a high performing straight sliding shutter system designed for external applications to help harvest energy, optimise room temperatures, increase air ventilation and provide flexible privacy options. The highly flexible system can cater for wooden and metal external louvre panels and shutters weighing up to 120kg.

The system has been designed to offer a variety of inspiring and functional design possibilities. Browse our Shutter Slide kit packs for easy specification and installation of single sliding panels, with an automation kit available as an optional extra. Alternatively, the system can be specified as individual components to cater for single panel; simultaneous action panel or telescopic panel variants for both manual or automated operation.

Available in 24V or 230V options, our state of the art motors can be operated by the push of a button or remote control. Alternatively the motors can be wired into the central control panel of a building, please consult the P C Henderson technical team for more details. As an optional accessory, specify our wall profile kit for a sleek and minimalistic finish.

Manufactured from 316 marine grade stainless steel, hard wearing polymers and anodised aluminium, Shutter Slide is extremely robust, highly corrosion resistant and developed to ensure a long lifespan.

Flexirol Multidirectional

Bespoke, tailored solution for wood or aluminium doors requiring 90 or 135 degree movement

Our Flexirol Multidirectional is a tailored solution for heavy weight doors requiring 90 degree and 135 degree movements. When open, doors slide to one or both sides of the opening. Flexirol Multidirectional 90 is designed for doors up to 100kg and Flexirol Multidirectional 135 caters for doors up to 500kg.

Catering for wood and aluminium doors, the system is ideal for commercial applications including shop fronts, internal room partitions, conference centres and showrooms. The system has been designed with a stacking formation which allows panels to be stored entirely clear of the opening, leaving a walkway that is clear from obstruction.

The system can also be made entirely bespoke and tailored to your exact requirements.

Flexirol Multidirectional Glass

Bespoke solution for glass panels weighing up to 500kg requiring 90 or 135 degree movement

Our Flexirol Multidirectional Glass is a bespoke system for glass panels weighing up to 500kg and requiring 90 degree or 135 degree movement. When open, panels stack neatly to one or both sides of the opening, leaving the walkway clear of obstruction.

Flexirol Multidirectional Glass 90 is designed for panels up to 100kg and requiring 90 degree movement and Flexirol Multidirectional Glass 135 caters for panels up to 500kg and requiring 135 degree movement.

Catering for glass panels of 10mm or 12mm thickness, the system is ideal for commercial applications including shop fronts, internal room partitions, conference centres and showrooms. The system has been designed with a glass profile which attaches to the top and bottom of the glass panel, as well as a unique stacking area

Accessories

Enhance your sliding or folding door systems with our range of accessories.

Browse our range of **flush pulls** and **finger pulls** which are ideal for sliding door and pocket door applications. They are recessed into the door frame, allowing for a flush and aesthetic finish.

Our **sliding door lock sets** are perfect for soffit fixed sliding door systems and are fitted flush to the door. When engaged, the lock securely connects to door to the jamb. Each lock set is designed with a release mechanism to allow for the opening of door from the non locking side in case of emergencies.

We also have a range of **flush bolts** available as an optional extra to our folding door systems. Flush bolts can be installed at the top and/or bottom of the door to securely hold doors in the closed position when not in use. As a suitable alternative, browse our range of **surface mounted bolts**.
